

Environment and Planning

The Environment and Planning team at NSW Public Works offers a broad range of expertise and experience in specialist infrastructure planning and advisory solutions related to environmental and sustainability issues across a diverse array of fields including historical heritage, Aboriginal heritage, ecology and biodiversity conservation, water quality, bushfire prevention, noise and traffic impacts.

Environment and Planning

Our core services include the preparation of environmental impact assessments for a wide range of proposals, from small additions to large and complex infrastructure projects. Our environmental planning and assessment and advisory services include:

Preparation of project specific planning pathway and approvals advice

- Environmental constraints assessment of design options
- Reviews of Environmental Factors – REFs (Part 5 of the Environmental Planning and Assessment Act 1979)
- Environmental Impact Statements (EIS)
- Statements of Environmental Effects (SEE) to accompany development applications
- Preparation of development applications including pre-DA meetings with local councils and review of draft conditions of consent, with a particular focus on Crown DAs
- Consultation with key project stakeholders and regulatory authorities
- Management and coordination of consultants in fields such as historical heritage, ecology and biodiversity conservation, Aboriginal heritage, bushfire prevention water quality monitoring, noise and traffic specialists.

Experience

Murray River to Broken Hill Pipeline

Client: Water NSW

Services: Preparation of the REF and coordination of all supporting specialist studies for the construction and operation of a 270 km long pipeline from the River Murray in Wentworth to Broken Hill to secure the water supply for Broken Hill and surrounding communities.

Outcomes: Delivery of the REF in a challenging environment of high cultural heritage significance and changing project.

Emergency Services Upgrade Program

Client: Fire & Rescue and Rural Fire Service, NSW

Services: Environmental assessment for the construction of new emergency services facilities or alternations to existing facilities across NSW in both metropolitan and regional areas.

Outcomes: By facilitating and streamlining the required planning approvals for FRNSW & NSW RFS projects, we have facilitated the effective and efficient delivery of this essential community service.

Nimmie Caira interim Land Management Review of Environmental Factors

Client: Department of Industry

Services: Preparation of the REF and coordination of all supporting specialist studies to assess the impacts and gain approval to undertake a series of land management works at the Nimmie Caira property, in south west NSW.

Outcomes: Development of a scope of works able to achieve client requirements whilst avoid culturally sensitive areas.
